

TN2405 Temperature sensor with display
ifm electronic gmbh

Product description

Compact temperature transmitter for hygienic and industrial applications. Robust stainless steel housing, four-digit display, switching output and analogue output in one device. Suitable for food and beverage plants, machine tools and process cooling.

Ordering information and accessories on request.

Technical data

Order number TN2405

Application temperature

Operating voltage 18...32 V DC

Output 4...20 mA / IO-Link

Measuring range -50...150 °C

Ambient temperature -25...80 °C

Protection IP67

Response time 3000 ms

Weight 120 g

Housing stainless steel 1.4404
